Lagos, Nigeria

PROFESSIONAL SUMMARY

Self-taught full-stack software engineer with a demonstrated ability to build production-grade applications from concept to deployment. Specializing in complex backend architectures, database design, and responsive frontend development. Currently an undergraduate at Obafemi Awolowo University studying International Relations while maintaining a strong commitment to continuous learning and shipping quality software.

CORE COMPETENCIES

Backend Development Node.js · Express · TypeScript · PostgreSQL · Prisma ORM · Database Schema Optimization

Frontend Development React · Next.js · Tailwind CSS · Responsive Design · Component Architecture

Tools & Platforms Git · GitHub · VS Code · Figma · Postman

PROFESSIONAL EXPERIENCE

Self-Employed Full-Stack Developer

Mid-2024 – Present

Building and deploying production-grade full-stack applications independently. Architected complete systems from database design through UI implementation, managing all aspects of development lifecycle including deployment and optimization.

Key Accomplishments:

- Designed and built multiple full-stack applications handling complex business logic and data processing
 - Implemented responsive, user-centered interfaces with attention to accessibility and performance
 - Optimized database schemas and queries for production-scale applications
 - Deployed applications to cloud platforms with proper environment configuration and monitoring
-

EDUCATION

Obafemi Awolowo University

Bachelor of Science in International Relations | 2023 – Present

LEARNING JOURNEY

2023: Began self-directed learning in digital marketing (Google certifications, SEO, SEM, content strategy) while pursuing university admission.

Mid-2024: Discovered web development through structured virtual web development classes. Completed an intensive 3-4 week program with live instruction via Google Meet and Zoom sessions.

Continued Learning: After completing the structured course, continued building expertise through self-directed study, documentation, and practical application by building production applications.

FEATURED PROJECTS

GeoWatch — Geopolitical Intelligence Platform

A comprehensive platform for real-time conflict tracking and humanitarian crisis monitoring. The system aggregates data from multiple sources, applies analytical processing, and presents insights through interactive visualizations.

Technical Architecture:

- Backend: Node.js with Express, PostgreSQL for data persistence, Prisma for ORM
- Frontend: React with Tailwind CSS for responsive design
- Data Processing: Real-time aggregation and transformation pipelines
- Deployment: Cloud-based infrastructure with monitoring and logging

Technologies: Next.js · TypeScript · Node.js · PostgreSQL · Prisma · Tailwind CSS · React

UN Resolutions Search Engine (*In Progress*)

A searchable database and analysis platform for United Nations resolutions. The system indexes historical UN resolutions and provides powerful search, filtering, and analytical capabilities for researching international policy decisions.

Technical Architecture:

- Backend: Node.js with Express, PostgreSQL for resolution data storage
- Frontend: React with Tailwind CSS for search interface and results display
- Search Engine: Full-text search and advanced filtering capabilities
- Data Processing: Resolution parsing and indexing pipelines

Technologies: Node.js · TypeScript · PostgreSQL · Prisma · React · Tailwind CSS

TECHNICAL SKILLS SUMMARY

Category	Skills
Backend	Node.js, Express, TypeScript, PostgreSQL, Prisma ORM
Frontend	React, Next.js, Tailwind CSS, Responsive Design
Databases	PostgreSQL, Schema Design, Query Optimization
Tools	Git, GitHub, VS Code, Figma, Postman
Languages	JavaScript, TypeScript
